

Geography Key Stage 3 Learning Journey at Higham Lane School

End of KS3! On to KS4!

How are people managing desertification?

What are the human and natural causes of desertification?

What are the opportunities and challenges in deserts?

What are the adaptations of desert species?

How are deserts able to form?

How are we managing rainforests?

What are the threats to rainforests?

What are the adaptations of a rainforest?

Where are large scale ecosystems located?

How do people protect themselves against tropical storms?

What weather does the UK experience?

What are the impacts of these UK weather events?

What causes climate change?

What is the evidence of climate change?

How are we mitigating and adapting to climate change?

What are small scale ecosystems?

What are food chains and food webs?

What are the impacts of tropical storms?

How do tropical storms form?

What is global atmospheric circulation?

Why do people live close to tectonic hazards?

How do people protect themselves against hazards?

How do earthquakes in HICs differ to those in LICs?

What is the distribution of plate boundaries?

How do convection currents cause plates to move?

What is the structure of the Earth?

Year 9
